

NSC Watson RR2Y 2250 CHU

Plant Characteristics

Highlights

NSC Watson RR2Y is an ultra early maturing variety and is suitable for the black soil zone of Saskatchewan as well as dark brown and brown zones. This variety exceeded our expectations with very strong early season vigor and very good height due to extended lower internode. Its characteristic leaf shape makes NSC Watson RR2Y easy to identify.

Key Strengths

- Ultra early maturing variety - suitable for black, dark brown, and brown soil zones of Saskatchewan
- Very strong early season vigor
- Very good height due to extended lower internode
- Very characteristic leaf shape makes this variety easy to identify

Characteristics

000.8 Relative Maturity	Purple Flower Colour
Ultra Early Maturity	Tawny Pubescent Colour
Rps6 Phytophthora	Black Hilum Colour
Medium Plant Type	Medium Plant Height
7-8 Adaptability	8 Emergence
10 Standability	8 White Mould
9 Seedling Vigour	9 IDC Rating

Rating Scale: 1-2 Poor, 3-4 Fair, 5-6 Good, 7-8 Very Good, 9-10 Excellent
